Re: Agreement on RA Implementation Process / Hamilton Sundstrand Facility
Southeast Rockford Groundwater Contamination Site – Source Area 9/10
Winnebago County, Rockford, Illinois

Dear Mr. Wilcoxson:

This letter is to supplement the United States Environmental Protection Agency's March 28, 2008 letter, by confirming that the EPA has agreed to the use of the enclosed remedial action process flow diagram (RAPFD) for future implementation of the remedial action (RA) at the Hamilton Sundstrand Corporation (HSC) property located within Source Area 9/10 of the Southeast Rockford Groundwater Contamination Superfund Site in Rockford, Illinois within the context and framework of the Consent Decree (CD) to be executed and lodged in Federal District Court.

The Illinois Environmental Protection Agency (Illinois EPA) participated in the development of the RAPFD and has had an opportunity to review and provide comments to EPA. Illinois EPA has indicated to EPA its agreement on the use of the RAPFD in implementing the RA under the CD. As discussed, the RAPFD will be included in the final, approved RA Work Plan to be submitted by HSC under the terms of the CD.

If you have any questions regarding this letter, please contact me at 312-886-6151.

Sincerely,

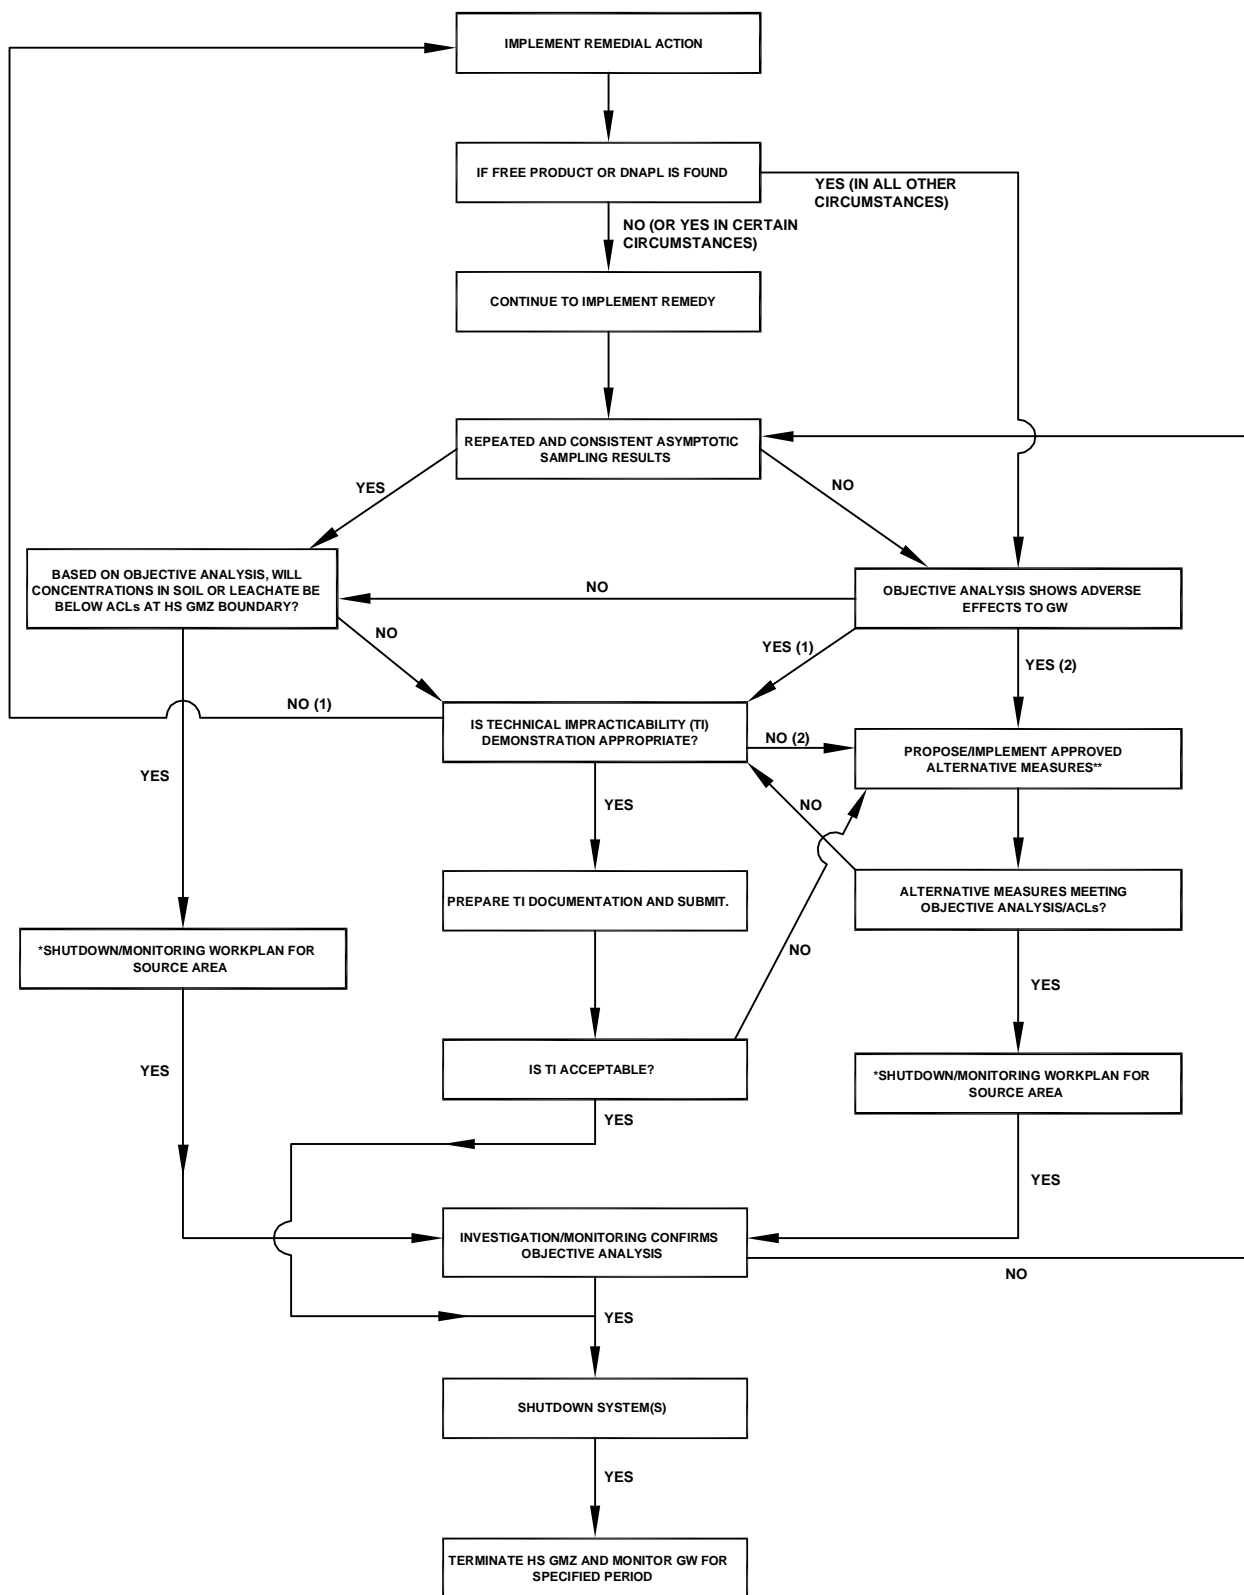

A handwritten signature in black ink, appearing to read "Shari Kolak", is positioned below the word "Sincerely,".

Shari Kolak
Remedial Project Manager
Superfund Division
